

Client Profile:

Mountain Valley Spring Water

For 135 years Mountain Valley Spring Co. has been bottling water from the site of the spring on 633 acres of company-owned land outside of Hot Springs National Park. Mountain Valley Spring is the country's oldest bottled water brand, with 285 employees. The company also owns seven water-bottling and delivery operations under the Clear Mountain name and operates a plastic container manufacturing business, Veriplas, which are both located in Little Rock.

The company has quite a reputation among celebrities and politicians as well. Thirteen presidents, from Coolidge to Clinton, have enjoyed their water as well as movie stars and music stars. For a full list, visit their website at www.mountainvalleyspring.com.

Mountain Valley has been in the Sage Software family for about eight years. With 25 users and several modules, the company makes full use of the software. Mountain Valley relies heavily on extended solutions to tailor the software to meet their specific needs. Jack Henderson, the Senior Vice President of Accounting, with Mountain Valley, says one of the major benefits of using MAS 200 is the way they can use Crystal Reports, a number of MS Access processes and the Visual Integrator module to integrate production reporting with Sales Order processing. He believes this has greatly improved the entire process. Asked about the service from Software Solutions of Arkansas, Jack says "Allan has taken care of us very well and Brenda works well with all the technical staff here". We certainly enjoy working with our friends at Mountain Valley.

Mountain Valley Spring was recently selected as a finalist in the Arkansas business of the year awards in the 76-300 employee categories. Good luck Mountain Valley Spring, and thanks for choosing us as your Sage reseller.

"Allan has taken care of us very well and Brenda works well with all the technical staff here"

- Jack Henderson
